

# 4<sup>th</sup> International i-Rec Conference 30 April - 2 May 2008

hosted at  
University of Canterbury New Zealand

Cornerstone  
Sponsors

**BUILDING RESEARCH**  
INVESTING FOR NEW ZEALAND'S CONSTRUCTION FUTURE

## Building resilience: achieving effective post-disaster reconstruction.

Post-disaster reconstruction presents many challenges, the key areas this conference is focussing on include:

- Project management and stakeholder participation for reconstruction
- Legal and policy frameworks for reconstruction
- Finance and resources for reconstruction
- Urban planning and design for reconstruction
- Education and training for reconstruction

I-Rec is the International Group for Research and Information on Post-Disaster Reconstruction. This will be the 4th International Conference dealing with this issue. 2008 will see this conference hosted at the University of Canterbury in Christchurch New Zealand.

To be held in conjunction with a meeting of **CIB Task Group TG63** - Disasters and the Built Environment.

***You are invited to submit abstracts  
before 30 August 2007***

Sponsorship is being sought to enable attendance by delegates with experience of reconstruction from developing countries, who would otherwise be unable to attend due to costs. If your organisation is interested in sponsoring a delegate please see the conference website.
